Wavestore Facial Recognition Dome Camera

Wavestore Facial Recognition Dome Camera brings NIST-leading live video face recognition and video analytics features to the edge. Embedded directly into the camera, Wavestore utilizes onboard compute functionality – eliminating the need for servers dedicated to processing video streams.

By eliminating server hardware, the Wavestore Facial Recognition Dome Camera makes it more cost-effective per camera in on-premises server hardware. Leverage powerful video analytics capabilities, in real-time with dramatic reductions in total cost of ownership.

Facial Recognition at the Edge

Facial Recognition
99.9% recognition accuracy per NIST

Live Video
The best solution for live video applications

Watchlist
Automated identification of persons of interest

Greater intelligence, lower TCO

- Perform key processing tasks on-camera – Face Capture and Recognition
- Reduce network bandwidth and eliminate server hardware demands
- Real-time face recognition and video analytics is now more affordable whether you deploy on one camera or hundreds
