

Always Up to Date: Your VMS, Always at its Best

Stay Ahead with Seamless Security Updates and Cutting-Edge Features

Wavestore's Always Up to Date subscription ensures your video management system (VMS) is always equipped with the latest technological advancements.

By subscribing, you receive all new features and functionality as they are released, along with the robust Health Monitor for proactive system oversight.

Transforming your Security Operations

With Always Up to Date, you no longer need to worry about falling behind on crucial updates or missing out on new features. This service is designed to keep your VMS in top shape, enhancing security, operational efficiency, and overall system performance.

Continuous Innovation

Access all new features and updates as they are released from our technology roadmap. Your VMS will evolve with the latest enhancements.

Enhanced Security

Regular updates include the latest security patches and system improvements, safeguarding your infrastructure against emerging threats and vulnerabilities.

Operational Efficiency

Updates are designed to streamline operations and enhance user interfaces, simplifying management tasks and boosting user satisfaction.

Proactive System - Health Monitor

Included in your subscription, the Health Monitor provides a real-time, centralized view of your entire Wavestore deployment. Detect and address potential issues early, ensuring maximum uptime.

Always Up to Date; always seizing opportunities

Challenges

Keeping up to date with the latest security protocols and system improvements

Ensuring your system is equipped with the latest security measures can be difficult with rapidly evolving threats.

Uplifting the productivity of security operators with best-in-breed features

Security operators need efficient tools and features to effectively manage and respond to incidents.

Managing a geographically dispersed security system with real-time oversight

Overseeing multiple sites and ensuring consistent performance can be a complex and time-consuming task.

Minimizing manual maintenance and upkeep to ensure optimal performance

Regular maintenance is necessary but can be labor-intensive and prone to oversight.

Opportunities

Continuous Innovation

Always Up to Date ensures you have access to the latest security patches and feature enhancements, maintaining a robust and secure system.

Operational Efficiency

Streamline operations and enhance user interfaces with regular updates, improving productivity and user satisfaction.

Centralized Dashboard View

With Wavestore Health Monitor, gain a real-time, holistic view of your entire deployment with color-coded health indicators for quick issue assessment.

Automated Notifications

Receive notifications of available updates, reducing manual intervention and ensuring your surveillance system remains optimal

Subscribe today and transform the way you protect, monitor, and enhance your operations. Stay secure, compliant, and future-ready with Wavestore's Always Up to Date service.
