

Client Workstations

Wavestore's Client Workstations have been designed specifically for use with Wavestore's WaveView client software for use in today's professional security environments.

Supplied complete with either a single or dual powerful RTX-Series graphics card from NVIDIA, 16GB of RAM, 1TB SSD with Windows 11 Pro pre-installed; each Client Workstation is capable of displaying multiple live and playback views simultaneously.

At a glance

Processor

Intel Core

Memory

16GB RAM

Graphics

NVidia RTX Series

System drive

1TB SSD

Operating System

Windows 11 Professional

With support either two or four simultaneous monitor connections, the Client Workstation connects to Wavestore Servers via the network and enables powerful day-to-day operation of Wavestore's VMS.

The compact size, with the option to expand as your business needs grow, makes this ideal for maximum space saving without sacrificing power.

Wavestore's WaveView and WaveView Mobile clients

WaveView is Wavestore's free of cost client software which delivers an intuitive interface designed to offer full, yet simple, control of total security solutions. Authorised WaveView client devices can simply access individual or grouped Wavestore NVRs to give users full control of their security system.

The WaveView Mobile application adds mobile viewing capability enabling operators to view and control their system from iOS or Android devices.

WaveView's leading search and playback capabilities allow operators to quickly review recorded images via an intuitive play bar, providing instantaneous access to exactly the right image from any point in time from the recorded data, even over large amounts of stored data.

Export of video evidence

In just three mouse clicks, operators can export clips from multiple cameras simultaneously to a variety of file formats or create a storyboard of events with a sequence of cameras, including virtual PTZ control of 360° fisheye cameras. Authentication and encryption of video and audio content are also supported.

Warranty

All Wavestore Client Workstations are supplied with a full three-year return to base hardware warranty.

Wavestore Video Management Software (VMS)

With Wavestore's highly-secure VMS at the heart of your total security solution, you have the freedom to bring together virtually any camera, device or system – combining video, metadata and audio – onto a common open-platform.

- Combine the world's leading camera brands, technologies and formats.
- Integrate access control, intruder & perimeter detection, intelligent video analytics, ANPR, EPoS, PSIM/BMS and much more.
- Highly-secure Linux architecture with hardening as standard.
- Compatible with a host of third-party off-the-shelf servers and appliances, or pre-installed on Wavestore's own range of NVRs & Video Servers.
- Benefit from our Always Up to Date licensing model, ensuring continuous access to the latest features and enhancements for at least 12 months without penalties.
- 100% free technical support to assist you every step of the way.

Key Features

- Pre-installed with Windows 11 Pro
- Connect two or four monitors
- Powerful graphics performance
- Three-year warranty RTB
